Simplexity

2009, Brain Bender Games, https://boardgamegeek.com/boardgame/55810

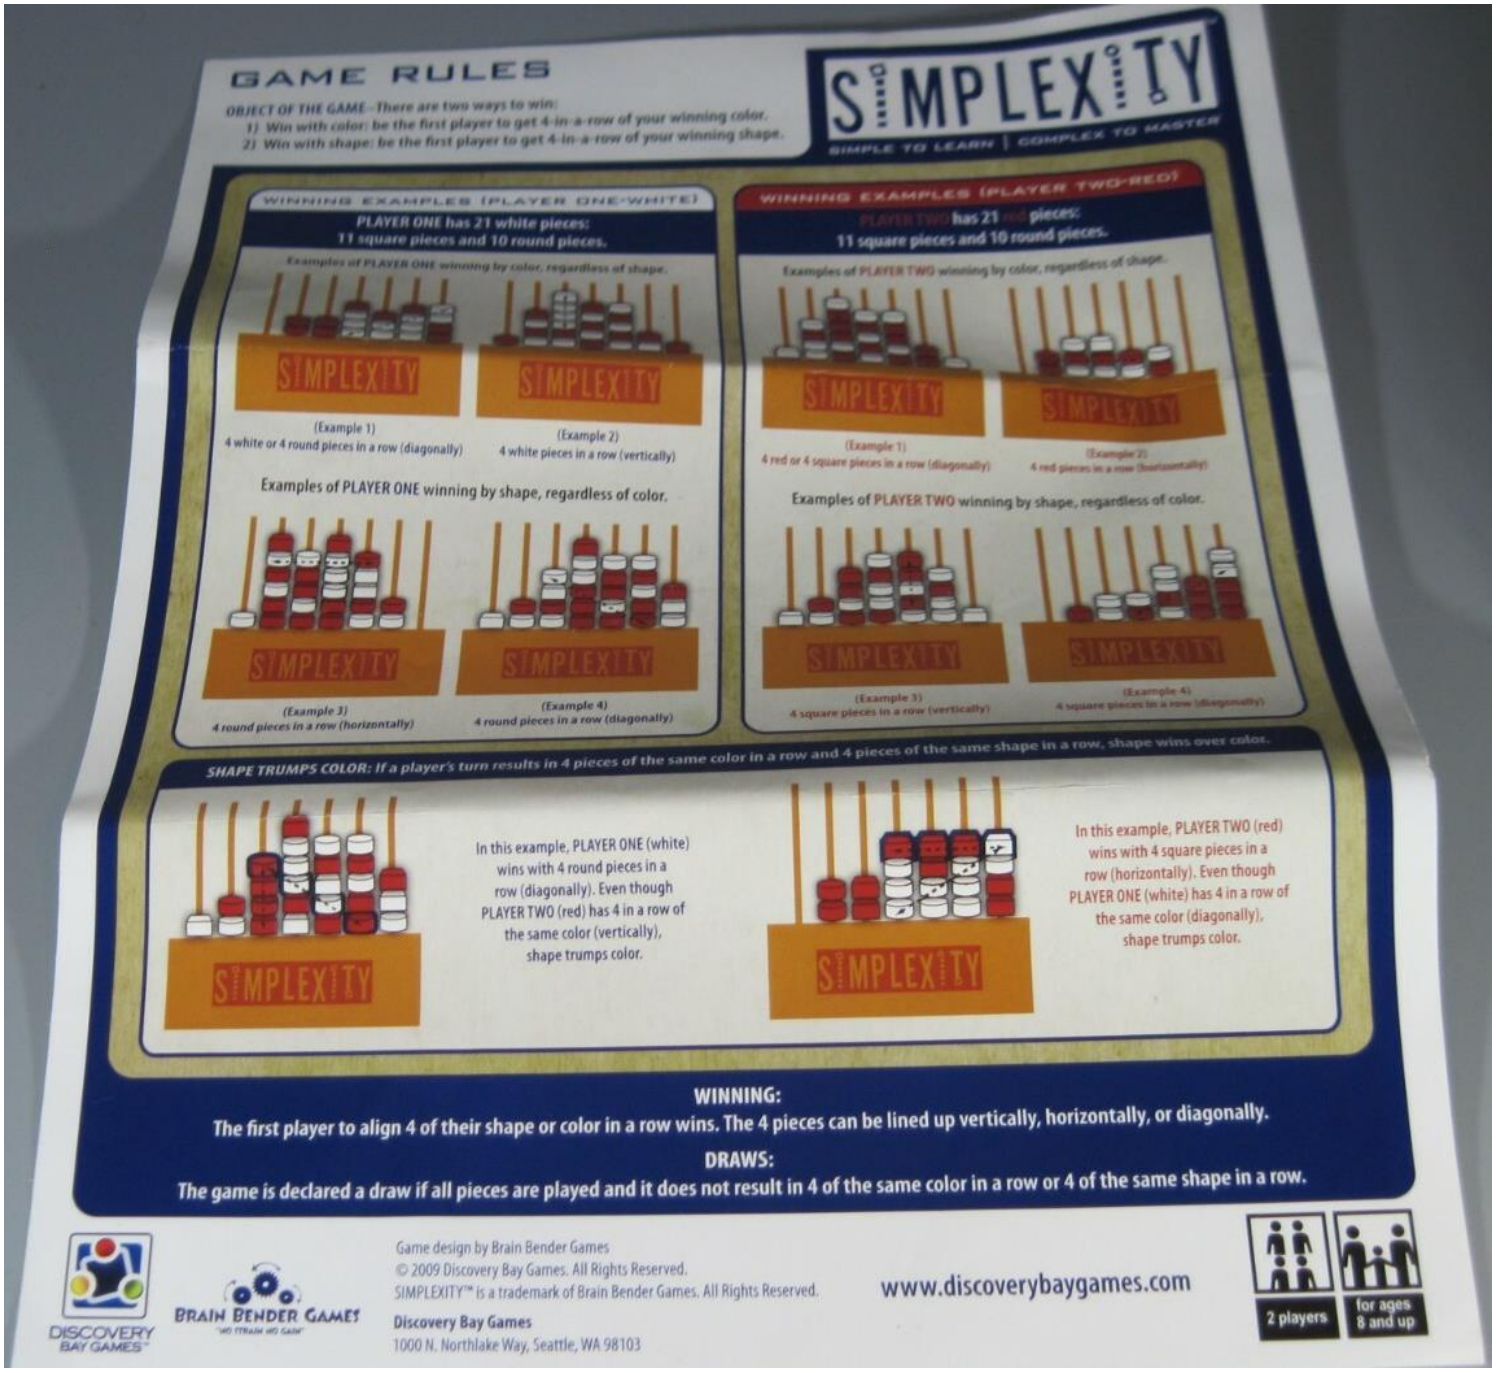
This is a Connect-4 game with the extra use of shapes:

board and material

Each player, on his turn, drops a friendly piece on a vacant column.

The player that makes four in-a-row with its color, or with pieces of the same shape (of either color) wins the game.

The original rules:



GAME RULES

SIMPLEXITY

SIMPLE TO LEARN | COMPLEX TO MASTER

OBJECT OF THE GAME—There are two ways to win:
1) Win with color: be the first player to get 4-in-a-row of your winning color.
2) Win with shape: be the first player to get 4-in-a-row of your winning shape.

WINNING EXAMPLES (PLAYER ONE-WHITE)

PLAYER ONE has 21 white pieces:
11 square pieces and 10 round pieces.

Examples of PLAYER ONE winning by color, regardless of shape.

(Example 1)
4 white or 4 round pieces in a row (diagonally)

(Example 2)
4 white pieces in a row (vertically)

Examples of PLAYER ONE winning by shape, regardless of color.

(Example 3)
4 round pieces in a row (horizontally)

(Example 4)
4 round pieces in a row (diagonally)

WINNING EXAMPLES (PLAYER TWO-RED)

PLAYER TWO has 21 red pieces:
11 square pieces and 10 round pieces.

Examples of PLAYER TWO winning by color, regardless of shape.

(Example 1)
4 red or 4 square pieces in a row (diagonally)

(Example 2)
4 red pieces in a row (horizontally)

Examples of PLAYER TWO winning by shape, regardless of color.

(Example 3)
4 square pieces in a row (vertically)

(Example 4)
4 square pieces in a row (diagonally)

SHAPE TRUMPS COLOR: If a player's turn results in 4 pieces of the same color in a row and 4 pieces of the same shape in a row, shape wins over color.

In this example, PLAYER ONE (white) wins with 4 round pieces in a row (diagonally). Even though PLAYER TWO (red) has 4 in a row of the same color (vertically), shape trumps color.

In this example, PLAYER TWO (red) wins with 4 square pieces in a row (horizontally). Even though PLAYER ONE (white) has 4 in a row of the same color (diagonally), shape trumps color.

WINNING:
The first player to align 4 of their shape or color in a row wins. The 4 pieces can be lined up vertically, horizontally, or diagonally.

DRAWS:
The game is declared a draw if all pieces are played and it does not result in 4 of the same color in a row or 4 of the same shape in a row.
