

PERIGON®

Perigon is the brand new two-player strategy game. The word "Perigon" means a 360 degree angle. Set up the unique board and you'll see why it was chosen, as you quickly get drawn into an enthralling world of angles and edges requiring all-round foresight and tactical imagination.

The richness of the game play means every battle will be different. Luck plays no part – only the cunning and clever will plant the Flag on the far goal line and win.

THE RULES

1. Each player has two Woods (brown) and two Granites (grey) while the Flag (red) is a communal piece. Set up the board like in the diagram below:

2. Players take alternate turns to make their plays. You have two moves per play to move your pieces. You move your pieces by rotating them clockwise or anti-clockwise in 90 degree arcs around the intersections of the grid:

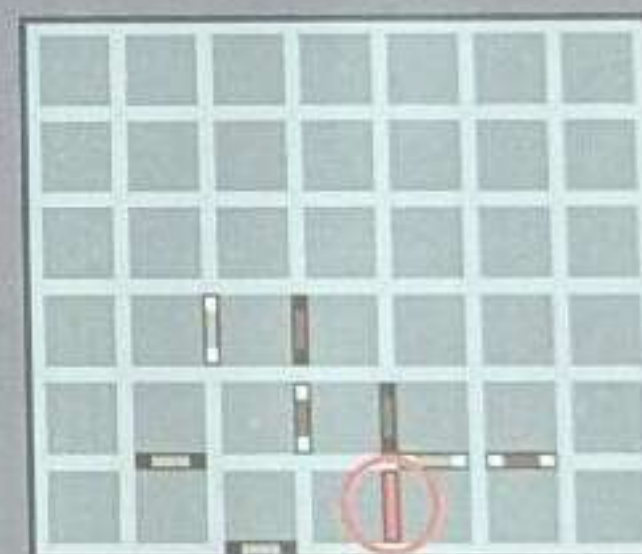

3. Granites can shunt past Woods, and when they do it counts as one move:

4. You can move the Flag as many times as you wish before, between and after your two main moves. However, you can only move the Flag by rotating it around any of your pieces on the board that it's connected to:

5. The aim is to make the Flag touch your opponent's goal line at the opposite end of the board. Once you have done this, you're the winner. See below for an example of a White victory:

Let the mind games commence...

Players: 2
Duration: 30 minutes
Minimum Age: 8+

5 060249 460008 >
