

## **Notakto (2010)**

### **Introduction**

Notakto is a misere 3-in-a-row game for two players. It's played on the squares of a finite number of initially empty 3x3 boards. All pieces are exactly the same and are shared by both players.

### **Definitions**

A board is *dead* if it contains at least one set of three stones in a straight orthogonal or diagonal line.

A board that is not dead is *alive*.

### **Play**

On their turn, a player must place a piece on an empty square of a living board.

When all boards are dead, the player who made the last placement loses.
