

Lancers

2021, Chris Huntoon, <https://boardgamegeek.com/thread/2626188>

It is played on an 8x8 board, with the following opening set-up:

White vs. Black. White goes first.

Object is to be the first to get a Lancer on to the enemy castle in the opposite corner.

Lancers move like Chess Rooks - sliding any number of open spaces horizontally or vertically.

Capture by Approach: A Lancer captures an enemy piece by moving towards it in a straight line and stopping on the square immediately before it, thereby capturing the enemy piece.
