2012, Rafi Arkin, Gavin Birnbaum, boardgamegeek.com/boardgame/125895/

The game is played on a 11x11 board,

Each player has 14 pieces: straights, zig zags, "U" shapes, and corners of varying sizes.

The pieces must be placed right side up, which is indicated by a groove carved into the top of the pieces. This often leads to difficult decisions needing to be made as to how to get most of your pieces onto the board while maximizing the points scored for each piece and preventing your opponent from getting his pieces onto the board.

Points are scored according to the number of existing pieces in contact with the piece already played, irrespective of color. Additionally, the four corner spaces and the central square are marked with a dot; pieces played over these dots score one extra point.
