

Pushmajor

2026, Emil Danielsen, <https://boardgamegeek.com/boardgame/461848>

initial setup

Win condition

Be the first player to push at least three of the opponents' stones off the board.

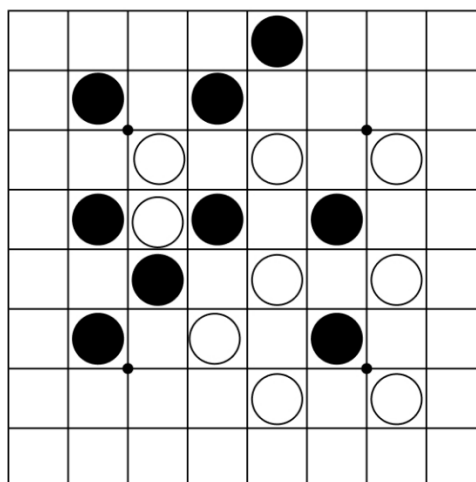

Movement.

Single stones move as kings in chess.

A line of stones may move in the direction of the line for as many spaces as there are stones in the line.

Pushing

A line of stones may push the opponents' stones if they are fewer in number than your own stones in that line.

Black's turn. Black's bottom left line of three stones may move diagonally up to the right and so push white's stone off the board.
