

## Quadefy

2011, Mark Fuchs, <https://boardgamegeek.com/boardgame/113517/quadefy>

*each player starts with an equal set of eight polycubes*

The first player places a friendly piece on the base of the board.

On each turn, each player places a new friendly piece on the base or over other pieces already on board. Pieces must be entirely inside the 4x4x4 volume that is the playing zone.

The first player unable to make a valid placement loses the game.

*the pieces*
