

## Ambush

2022, Coelacanth's Limited, <https://boardgamegeek.com/boardgame/367942>

The game is played on the following board,

Each player has 25 triangular pieces, plus several tokens to mark prisoners (see below).

On his turn, the player drops a friendly piece on an empty board triangle.

- The piece cannot be adjacent to another friendly piece (so no faces of two friendly pieces that touch, however they can touch corners).

When three pieces enclose an opponent piece, that piece is captured; the player does not remove it but, instead, mark it as a prisoner. Notice that if a player places a piece in the middle of three opponents, his piece becomes immediately imprisoned.

When one player cannot legally move, the game ends. The player with more prisoners wins the game (or is a tie, if both have an equal number of prisoners).
