

# Nocca x Nocca

2017, Team Undanoga, <https://boardgamegeek.com/boardgame/265617>

The game is played on a 5x5 board,

Each player has five dice-like pieces that start on the player's first row.

Pieces can be stacked up to height three. Only the stack's top piece can be moved.

- On his turn, the player must move a friendly piece to an orthogonally adjacent square. This final square can be empty, with a single piece (of either color), or with a stack of height two. In the latter two cases, the moving piece goes to the top
- Pieces can also move out the board from the player's last row
- The player wins the game if either one of the following conditions occurs:
  - The opponent does not have a valid move (because all his pieces have other pieces over them)
  - The player moves out all his pieces
