

Shima Enaga Dango (シマエナガだんご)

2026, Toshishige Kikuchi (Iroduru), <https://irodorukokoro.stores.jp>

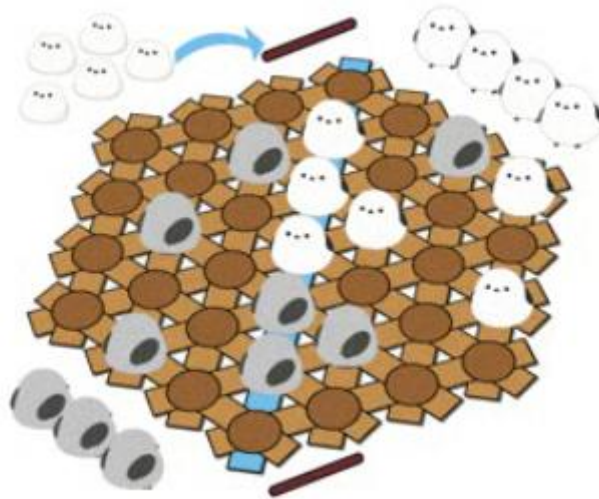

The game is played on a hexhex4 board,

each player has 10 pieces in reserve

On his turn, the player either places a piece on an empty cell, or move an existing piece to an adjacent cell [can it also remove a piece on-board into the reserve?]

Anytime a 5 in-a-row is made, the player with most pieces will get one point (the diagram uses a stick to place birds, that serves as a counter).

The player that first gets three points wins the game.
