

Un-Tria

2026, Yonemitsu Games Lab

The game is played on a 5x5 board, each player having one royal piece and eight soldiers.

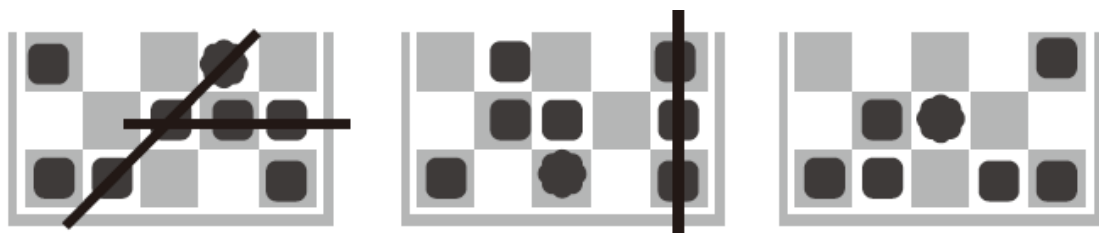

Definition: A **Formation** is defined as three or more of your own pieces lined up in a straight line (orthogonally or diagonally) with no empty spaces between them.

the four patterns of a valid formation

When his turn ends, the player **must** maintain at least one "Formation" within your own forces on the board. Making a move that causes you to have zero active Formations is strictly forbidden (an illegal move).

the third board is invalid, no formation exists

- If a player accidentally makes an illegal move (leaving themselves with no valid Formations) and ends their turn, the opponent can call out "**Un-Tria!**"

before taking their own next action. If this declaration is successfully made, the player who made the illegal move immediately loses the game.

There are three types of action:

1. Movement:

- The maximum range of a piece/stack is given by its height
- Kings move diagonally or orthogonally (in all eight directions)
- Soldiers move only orthogonally
- Stacked pieces always move according to the movement rules of the bottom-most piece in the stack (whether it is a King or a Soldier).
- The pieces can stack together up to three friendly pieces (including the King).
- Captures are by replacement
- Pieces cannot jump other pieces (friend or foe)

2. Stacking

- Place one of your pieces directly on top of another adjacent piece belonging to you to concentrate your forces. "Stacking" is a standalone action. You *cannot* move a piece and then stack it on the same turn

3. Unstack / Deploy

- Separate a stacked piece to deploy new forces onto the board.
- When taking the "Unstack" action, the piece being removed can only move exactly one space, regardless of how many pieces are in the stack.
- The direction of movement is dictated by the type of piece being unstacked (King or Soldier).
- If an opponent's piece occupies the destination space, it is captured.

Goal. A player wins if either: (a) captures the opponent's King, (b) destroys all formations, (c) reduces the opponent's army to three or less pieces
