STACK. BREAK THROUGH. RUN.

CURRERE

from the Latin: to run

RULES OF PLAY

2 players · 10–35 minutes · 36 hex tiles

© 2026 Kyriakos Christodoulou. All rights reserved.

WELCOME

The game in one minute

Currere is a race with teeth. Each player starts with 18 plain tiles. Stack them into **Runners** that sprint across the board, or into **Fighters** that clear a path and hold the line. Run a stack off your opponent's far edge and every tile in it banks a point.

HOW TO WIN

Be the first to bank **6 points**. Every tile you run off the far edge is worth 1 point, so a stack of 3 is worth 3.

BUILD

Stack tiles into Runners or Fighters. The choice is permanent.

CLASH

Remove enemy units, or detonate a Fighter to blow a hole in their line.

SCORE

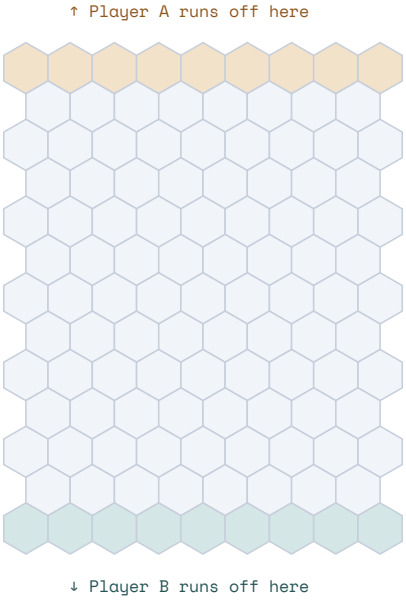

Run a stack off the far edge to bank its tiles as points.

COMPONENTS

The board

The board has **13 rows** of hexagons that alternate between 9 and 8 hexes, **111 hexes** in all.

Each player sits at one end. The row nearest you is your **home row**; the row nearest your opponent is your **far row**.

You score by **banking**: a unit that can reach your far row runs off the board over that edge and scores its tiles.

IN THE BOX

- ⬡ 1 hex board
- ⬢ 18 amber tiles
- ⬢ 18 teal tiles

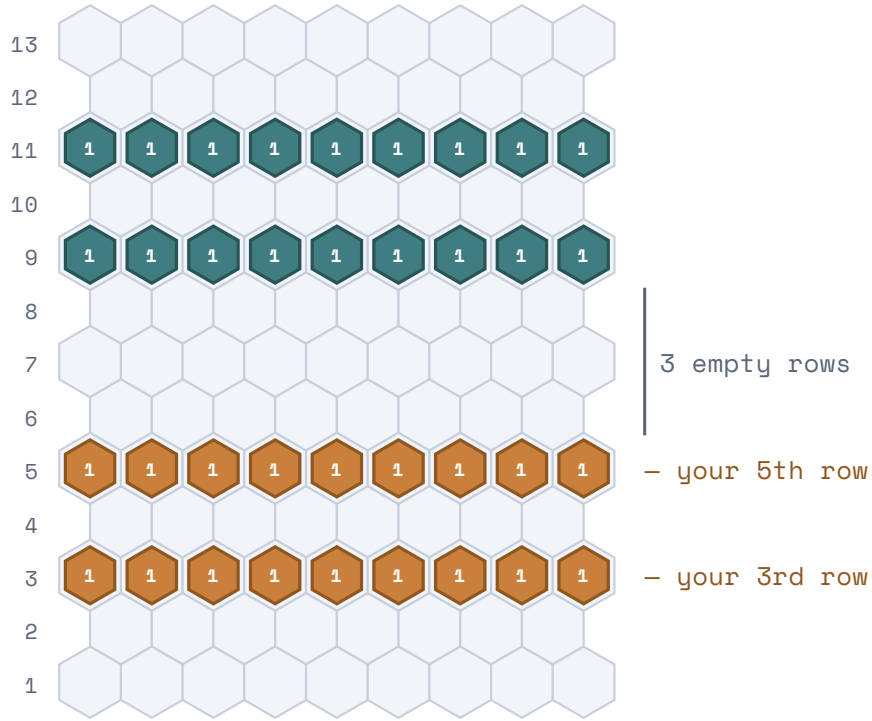

ROW NUMBERS

This booklet numbers rows 1 to 13 from Player A's side, as the app does. Neighbouring hexes share an edge: every hex has up to **6 neighbours**.

Play the app version: scan the code on page 14.

BEFORE YOU PLAY

Setting up

1. Sit at opposite ends of the board. Player A plays amber, Player B plays teal.
2. Counting from your own edge, place **9 tiles on your 3rd row** and **9 tiles on your 5th row**. Both are full 9-hex rows.
3. Check that the **3 middle rows** are empty and that nobody has anything on their 1st, 2nd or 4th rows.
4. Decide who moves first, for example by tossing a coin. In a complete tie, the player who moved **second** wins (page 13).

HOW TO PLAY

Taking a turn

Players alternate turns. On your turn you take **exactly one action** with one of your units. You may not pass.

Move

p. 8

Move one unit through empty hexes, up to its speed.

Stack

p. 7

Join a unit to an adjacent friendly unit to make a bigger stack.

Attack

p. 9

Remove an adjacent enemy unit that your unit is allowed to beat.

Detonate

p. 11

A Fighter destroys itself and everything on the 6 hexes around it.

Bank

p. 12

Run a stack off your far edge and score its tiles.

EVERY ACTION COUNTS

Stacking, attacking and detonating each use your whole turn, just like a move. Your units never act twice in one turn.

YOUR FORCES

The three units

Every unit is a stack of 1 to 3 tiles. The number of tiles is its **size**. What a unit can do depends on its type and size.

Single

TILES	**1**
SPEED	**1**
STRENGTH	**1**

Can attack enemy **Singles** only. Every tile starts the game as a Single.

Runner

TILES	**2 or 3**
SPEED	**= its size**
STRENGTH	**0 ***

Fast. Can attack enemy **Runners of the same size or smaller**. Fragile: any Fighter can remove it.

* Against other Runners its strength equals its size.

Fighter

TILES	**2 or 3**
SPEED	**1**
STRENGTH	**= its size**

Slow and strong. Attacks any enemy with **lower strength**, and can **Detonate**.

HOW TO TELL THEM APART

Single Runner Fighter

On the table, **Runners** are stacked straight and **Fighters** are stacked with each tile turned 30°. In the app, Runners show an arrow and Fighters a star with an extra outline.

Permanent choices. A unit's type never changes and a stack can never be split back into Singles. Plan your stacks carefully.

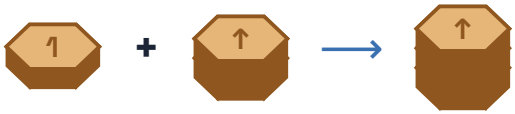

ACTION

Stack

Choose one of your units and an **adjacent** friendly unit. The first unit joins the second, forming one stack on the **second unit's hex**. A stack can hold at most **3 tiles**.

Two Singles: you choose Runner or Fighter.

A Single joining a Runner makes a bigger Runner.

A Single joining a Fighter makes a bigger Fighter.

NOT ALLOWED

Four tiles is one too many.

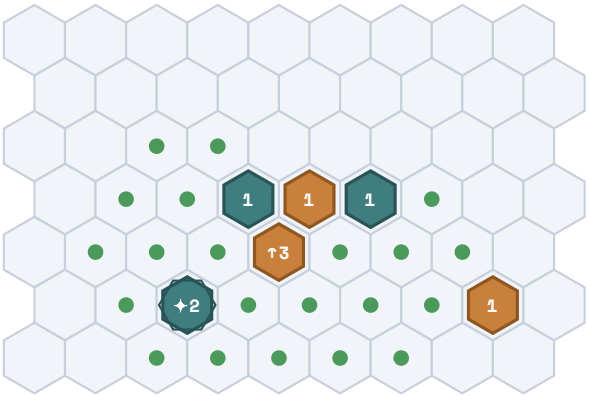

REMEMBER

Stacking uses your whole turn. Both units must be yours and must be neighbours. The new unit keeps the type of the unit that already had one; only two Singles let you choose.

ACTION

Move

Move one unit up to its **speed** in steps, from hex to neighbouring hex. Every hex you pass through or stop on must be **empty**. You may change direction, move sideways or backwards, and stop early (you don't have to use all your allowed movement).

The amber **Runner-3** has speed 3. Green dots show every hex it can reach this turn.

Tiles block movement: yours and your opponent's. Nothing can jump over a tile, so the Runner must go **around** the wall in front of it.

SPEED

1 hex

Single

1 hex

Fighter-3

2 hexes

Runner-2

3 hexes

Runner-3

GOOD TO KNOW

Singles and Fighters always move **1 hex** per turn, however big a Fighter is. Only Runners get faster as they grow.

ACTION

Attack

Choose one of your units and an **adjacent** enemy unit it is allowed to beat. The enemy unit is removed from the board, **all of its tiles**. Your unit **stays where it is**.

Removed tiles are simply out of the game. They score nothing for either player.

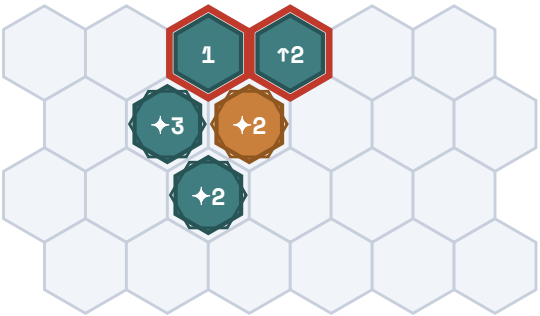

STRENGTH

* A Runner attacking or defending against another Runner uses its size.

A **Fighter** can attack any enemy whose strength is **lower** than its own. Singles and Runners follow their own simple rules:

- A **Single** can attack an enemy **Single**.
- A **Runner** can attack an enemy **Runner of the same size or smaller**.
- Nothing can attack a **Fighter-3**. Only a detonation can remove it.

The amber **Fighter-2** (strength 2) can attack the teal **Runner** and **Single** (red rings). It cannot attack the teal Fighter-2 or Fighter-3 next to it.

REFERENCE

Who can attack whom

Find your unit in the left column and read across. A tick means you may attack that enemy when it is next to you.

YOUR UNIT ↓ / ENEMY →	 Single	 Runner-2	 Runner-3	 Fighter-2	 Fighter-3
 **Single**	✓	—	—	—	—
 **Runner-2**	—	✓	—	—	—
 **Runner-3**	—	✓	✓	—	—
 **Fighter-2**	✓	✓	✓	—	—
 **Fighter-3**	✓	✓	✓	✓	—

TWO THINGS TO NOTICE

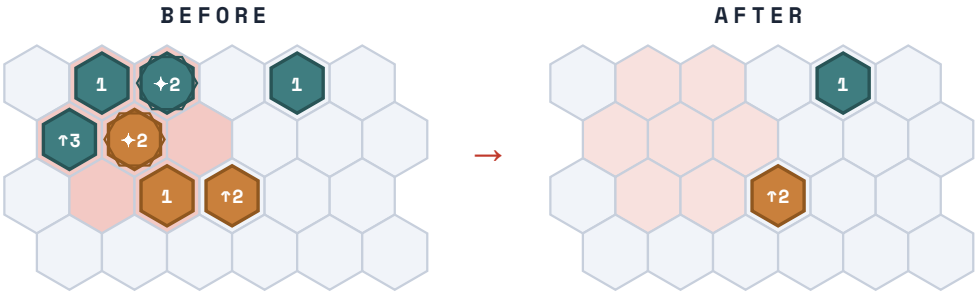

Singles can never attack Runners, but a line of Singles **blocks** them. And a Fighter-2 wall can only be broken by a **Fighter-3** or by **detonating** a Fighter.

ACTION

Detonate

Instead of attacking, a **Fighter** (size 2 or 3) may detonate. Remove the Fighter **and every tile on the 6 hexes around it**, whoever they belong to.

You may only detonate when **at least one enemy unit** is next to your Fighter. Destroyed tiles score nothing.

Teal loses	Runner-3, Single, Fighter-2	**6 tiles**
Amber loses	the Fighter-2 and one Single	**3 tiles**

WHEN IS IT WORTH IT?

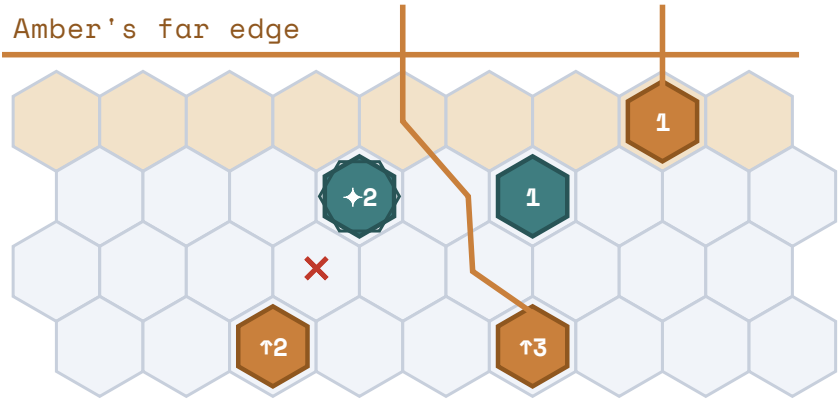

A good detonation takes more enemy tiles than it costs you, removes something nothing else can (like a Fighter-3), or blows a gap in a wall for your Runners to race through. Mind your own tiles: they are in the blast too.

ACTION

Bank: scoring points

If one of your units could reach **any hex of your far row** this turn with its normal move, it may instead **run off the board** over that edge. Take it off and bank **1 point per tile** in it.

A unit already standing on your far row can bank straight away.

↑3	**Runner-3**	Three steps reach the far row, so it banks: **+3 points** in one action.
1	**Single**	Already on the far row, so it banks: **+1 point**.
↑2	**Runner-2**	Three rows away but speed 2: **not yet**. Next turn it can bank.

STACK BEFORE YOU SPRINT

Three Singles need three separate turns to bank 3 points. A Runner-3 does it in one, and moves three times as fast getting there.

GAME END

Winning the game

6

The first player to bank

6 points wins immediately.

Points only come from banking tiles off your far edge.

The game also ends if nobody has won when either of these happens:

- A player has **no tiles left** on the board.
- **Neither player** has any legal action left.

THEN THE TIEBREAK DECIDES

1. **More points**
   The player with more points wins.

↓

2. **More tiles on the board**
   If points are equal, count every tile still on the board, stacks included.

↓

3. **The second player**
   Still equal? The player who moved second wins, balancing the first-move advantage.

PLAY BETTER

Strategy tips

1 Mix your army

Runners score, Fighters clear the way and block. An army of only one kind is easy to overcome.

2 Think in threes

A Runner-3 moves three hexes and banks three points in one go. It is worth the investment in turns to build.

3 Singles make walls

Singles cannot hurt Runners, but they can block or trap them. A line of Singles buys you time.

4 Mind the Fighters

Any enemy Fighter next to your Runner can remove it. Do not end a move beside one.

5 Crack the wall

A wall of Fighter-2s stops everything except a Fighter-3 or a detonation. Plan one early.

6 Threaten two lanes

One Runner can be blocked. Two Runners heading for different gaps are much harder to stop.

7 Every tile counts

If the game ends without a winner, tiles on the board decide it. Do not trade tiles away cheaply.

PLAY THE APP

Currere online

Scan to play in any browser: tutorial, computer opponent at three levels, and a face-to-face tablet mode. Nothing to install.

Questions & answers

Q Can a unit move backwards or sideways?
Yes. Any direction, and it may turn during its move.

Q Must a Runner-3 move all 3 hexes?
No. Speed is a maximum; you may stop after 1 or 2.

Q Can I move through my own tiles?
No. Every hex on the way must be empty, whoever the tile belongs to.

Q Can I move and stack in the same turn?
No. Stacking is a whole action; both units must already be neighbours.

Q Does attacking move my unit?
No. The target is removed and your unit stays where it was.

Q Do destroyed tiles score points?
No. Only banked tiles score.

Q Can a Single attack a Runner?
No. Singles only attack Singles, but they can block Runners.

Q Can two Runner-2s stack?
No. That would make 4 tiles; the limit is 3.

Q Can I split a stack or change its type?
Never. Both are permanent.

Q Can a Fighter detonate with no enemy next to it?
No. At least one enemy unit must be adjacent.

Q What if I have no legal action?
You skip your turn; it is rare and usually brief. If neither player can act, the game ends.

QUICK REFERENCE

Currere at a glance

GOAL

Bank tiles off your far edge. **1 point per tile. First to 6 wins.**

SETUP

9 Singles on your 3rd row and 9 on your 5th row, counted from your own edge.

ON YOUR TURN: ONE ACTION, NO PASSING

Move up to your speed through empty hexes.

Stack with an adjacent friendly unit, max 3 tiles. Single + Single: choose the type.

Attack an adjacent enemy you can beat. Your unit stays put.

Detonate a Fighter (enemy adjacent): remove it and everything on the 6 hexes around it.

Bank a unit that could reach your far row this turn: score its tiles.

UNITS

	TILES	SPEED	STRENGTH	CAN ATTACK
 **Single**	1	1	1	Singles
 **Runner**	2–3	= size	0 (vs Runners: size)	Runners ≤ its size
 **Fighter**	2–3	1	= size	lower strength

ENDING THE GAME

First to 6 points wins. Otherwise the game ends if nobody can act, or when a player has no tiles left.

Tiebreak: more points, then more tiles on the board, then the player who moved second.
