

"Cats Jump Around on the Kotatsu" – Rules Explanation

Game Overview

This is a two-player game where players move white and black cat pieces, aiming to leave as many pieces of their own color on the board as possible. Points are determined by the positions of the remaining pieces, and the player with the higher score wins. Move your pieces strategically to secure victory!

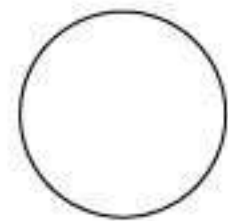

Components

12 white cat pieces
12 black cat pieces
1 game board + 1 cloth
1 rule sheet (this paper)

heads

tails

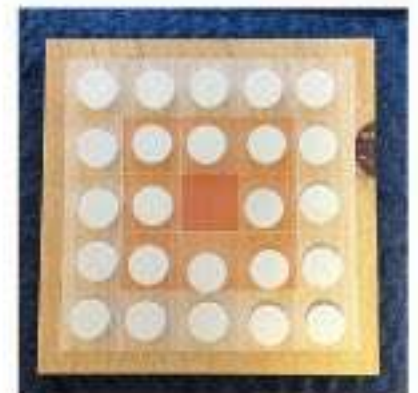

ゲームの準備

① Cover the box with the cloth and place the board on top to create a "kotatsu."

② Flip all pieces (both white and black) face down and shuffle them well.

③ Place one piece face down on each square except the center square of the board.

④ Decide first and second player (e.g., rock-paper-scissors).

First player: Black

Second player: White

Each player uses their corresponding color.

rendering
→

⑤ Flip all pieces on the board face up in their current positions.

Game Flow

Players take turns, starting with the first player, moving pieces.

You may move either your own pieces or your opponent's pieces.

Choose one piece and jump over adjacent pieces (vertically or horizontally) by 1 or 2 spaces.

(You cannot simply move without jumping.)

The destination square must be empty.

Any pieces that are jumped over are removed from the game, regardless of color.

As the game progresses, empty spaces increase. You cannot move a piece off the board.

If a move involves jumping, you must complete the jump.

If there are no pieces you can move, the game ends.

Examples of Movement

Jumping over 1 piece

Jumping over 2 pieces (all jumped pieces are removed)

You may change direction if multiple jumps are possible

End of Game & Determining the Winner

The game ends when no more moves are possible.

● Scoring

Points depend on where your pieces remain:

Center square: 3 points

8 surrounding squares: 2 points each

Outer 16 squares: 1 point each

Add up the total points for each player.

The player with the higher total wins.

● Tie-breaker

If scores are tied, the player with fewer remaining pieces wins.

If still tied, the game is a draw.

1P	1P	1P	1P	1P
1P	2P	2P	2P	1P
1P	2P	3P	2P	2P
1P	2P	2P	2P	1P
1P	1P	1P	1P	1P

← Sample

Black: $3P + 2P = 5P$

White: $2P + 1P + 1 + 1P = 5P$

Black: 2 pieces

White: 4 pieces

→ Black wins

Additional Rules

Even if a piece can jump over two pieces, you may choose to jump over only one instead.

Advanced (More Strategic) Setup Rules

① Decide first and second player
(e.g., rock-paper-scissors).
First: Black
Second: White

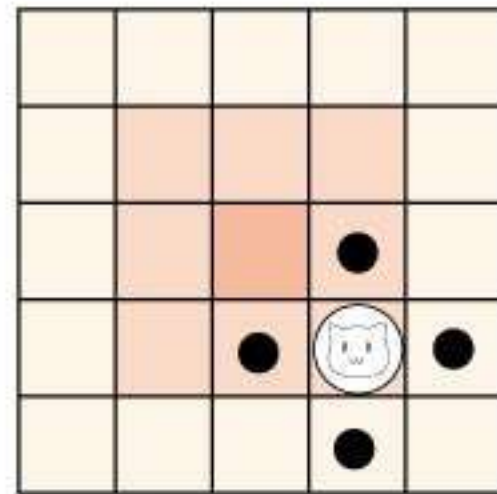

② Distribute them so each player gets their own color pieces.

③ Starting with the first player, take turns placing one piece of your color on any square.

However, you must place your piece in a location adjacent to an already placed piece, either vertically or horizontally.

Once all pieces are placed, begin the game with the first player.

The rest of the rules are the same as the standard game.

You may place it in the center or near the edges.

※ In this setup, the center square does not necessarily have to be empty.
