迎风 Upwind v2.4.2

MY Tian (2026)

A 2-player territory game inspired by *Realm*.

I Materials

8×8 square board.

Each player has:

- 2 round pieces, called **Sylph**;
- sufficient square pieces, called **Seed**;
- sufficient triangular pieces, called **Squall**.

II Setup

As in the picture.

III Gameplay

Starting from Blue, player take turns alternatively.

Each turn, move a friendly **Sylph** orthogonally. Neither can it leap over other pieces, nor leap over **destroyed** cells (see below). It can either be moved to an empty cell, or to a cell contains friendly **Seed** then capture that piece.

If the **Sylph** moves from left to right, left is called "upwind side", right is called "downwind side", from-left-to-right is called "wind direction", from-right-to-left is called "anti-wind direction". Other 3 moving directions are similar.

After the **Sylph**'s movement, resolve automatically in the following order:

a) If the **Sylph** moved to an empty cell, create a friendly **Seed** on its original location; if it captured a friendly **Seed**, then create a friendly **Squall** instead.

b) For every friendly **Seed**, except the ones that were created in **a)** and **b)**: if its upwind side adjacent cell is empty, create a friendly **Seed** in that cell. **Seed(s)** on the upwind side create first.

c) For every friendly **Squall**, except the one that was created in **a)**: it moves in wind direction as far as possible. Neither can it leap over other pieces, nor leap over **destroyed** cells. It can either move to an empty cell, or to a cell that contains enemy **Seed** or **Squall** then capture that piece. If it captured a **Seed**, its original location is **destroyed**. If it captured a **Squall**, it destroys self and both cells are **destroyed**. **Squall(s)** on the downwind side move first.

IV Winning

Passing is allowed. Passing when there are legal move(s) is called "active pass"; passing because there isn't a legal move is called "passive pass".

If both players active pass consecutively, game ends. If any player passive pass, their opponent has another move before the game mandatorily ends.

Gain 1 point for every **Seed** each player has. Yellow(Gote) has 1.5 extra points for balancing purpose. More points wins.

Notation: Active pass is recorded as "pass"; passive pass is recorded as "--".

V Tips

Always pay attention to the mobility of your **Sylphs**, as well as limiting your opponent's (the growth of **Seeds** may make unexpected effect). Though it's hard to keep all four directions available, usually you only need several of them.

Carefully choose the position of your **Squalls** early, but the destruction of your opponent's **Seeds** can often be delayed until the board is almost full.

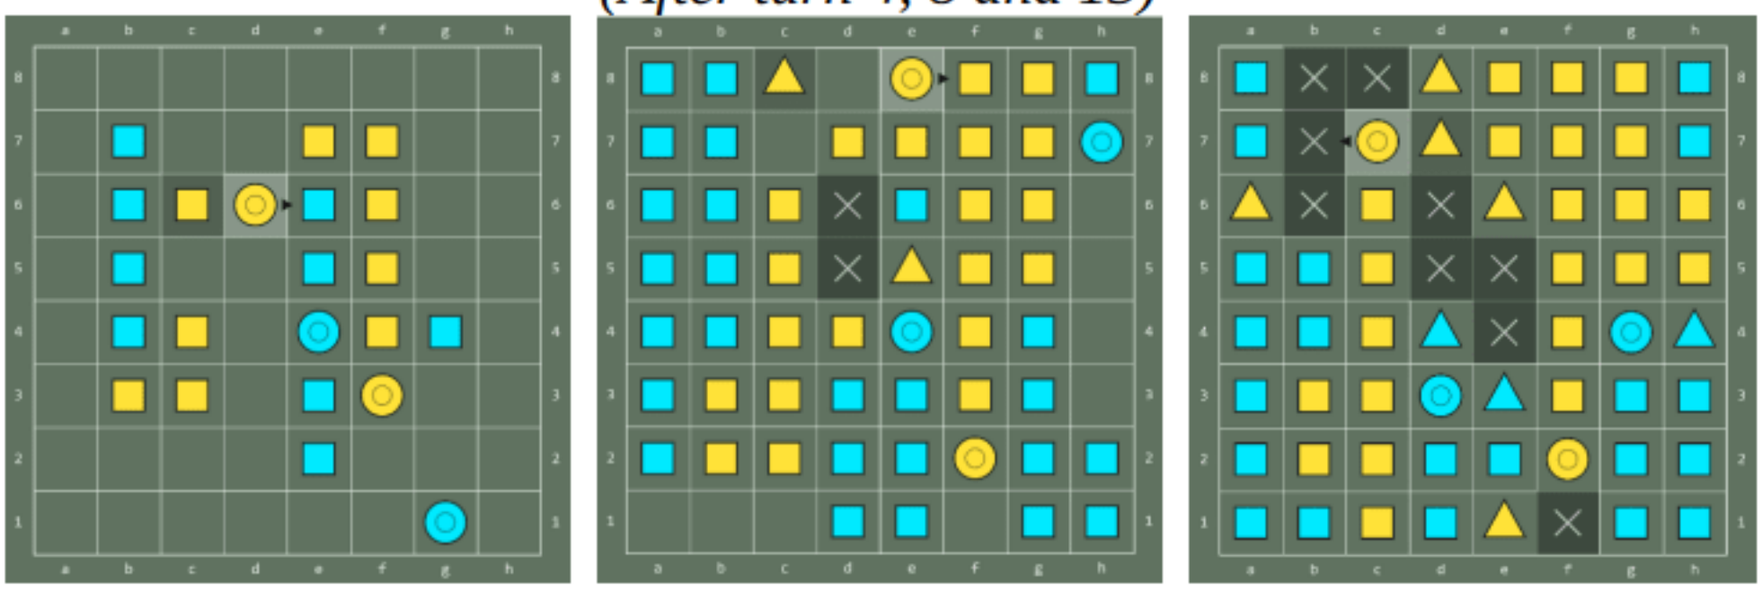

VI Sample Games

Electronic board: https://game.chplk.cc/play/upwind/upwind.html

Meiyounicheng 21 : 23.5 MY Tian

1. b5-e5 f6-f4 2. e5-e2 c3-c6 3. e2-e4 f4-f3 4. g4-g1 c6-d6
5. g1-h1 d6-c6 6. h1-h8 f3-f2 7. h8-h2 c6-c8 8. h2-h7 c8-e8
9. h7-h3 e8-d8 10. h3-h4 f2-f1 11. h4-g4 f1-f2 12. e4-e3 d8-d7
13. e3-d3 d7-c7 14. resign

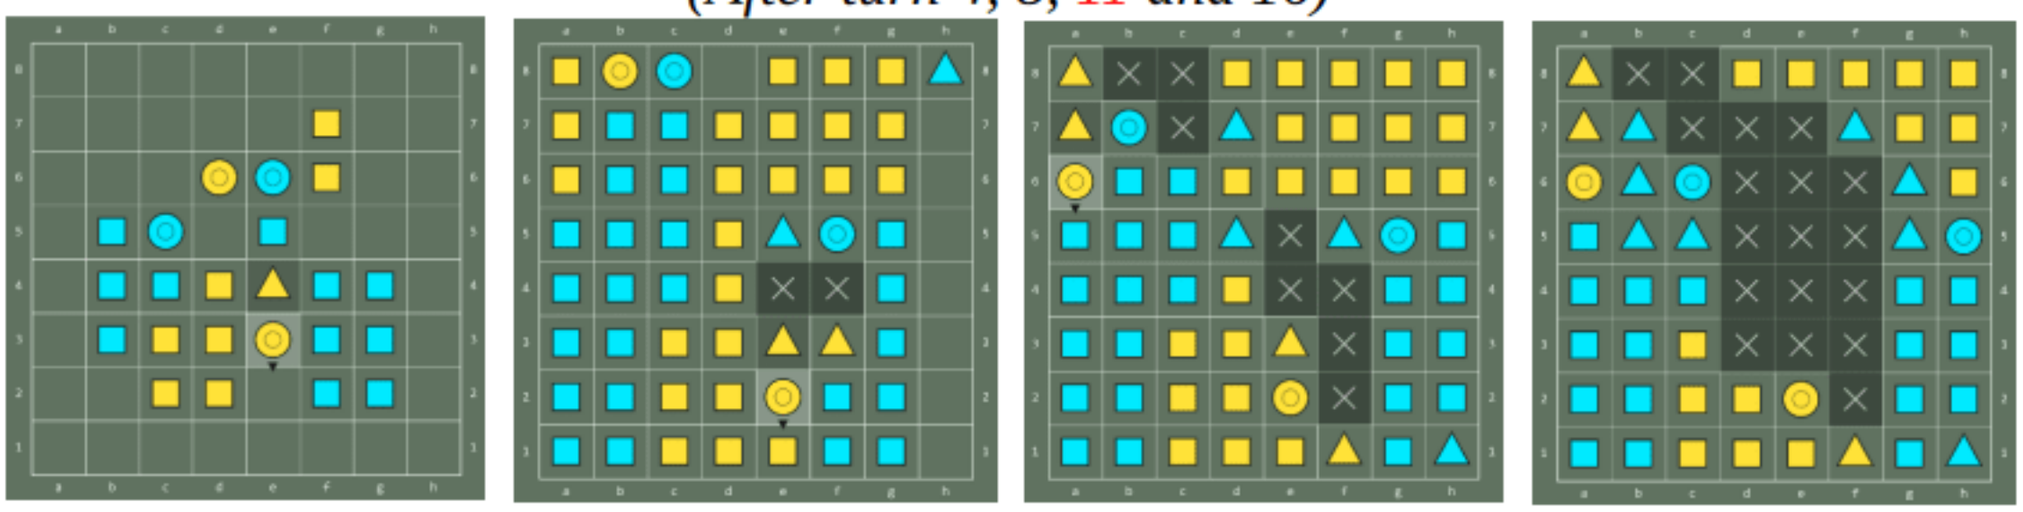

(After turn 4, 8 and 13)

MY Tian 17 : 15.5 Meiyounicheng

1. g4-c4 c3-e3 2. b5-e5 e3-e4 3. c4-c5 f6-d6 4. e5-e6 e4-e3
5. c5-c7 d6-a6 6. e6-e5 a6-a8 7. c7-c8 a8-b8 8. e5-f5 e3-e2
9. c8-c7 b8-a8 10. c7-b7 a8-a7 11. f5-g5 a7-a6 12. b7-b6 pass
13. b6-b5 pass 14. b5-c5 pass 15. c5-c6 pass 16. g5-h5 resign

(After turn 4, 8, 11 and 16)

VII Designer's Note

Using an unsymmetrical setup is mainly to avoid imitating. I haven't tried if there exists other setups that can make the game more balanced, such that there's no need to give Gote extra points. I'll change the setup if I find one.
