Lilypad Leap

A splash of strategy for 2-4 players

by Playlines Games https://linktr.ee/playlines

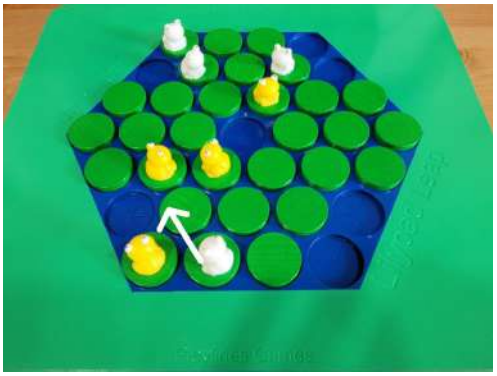

Your Frogs are in a contest on the pond. Knock your opponent's Frogs into the water to win.

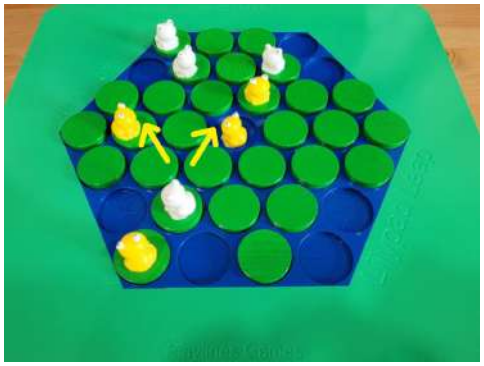

Classic Mode: 2 Player / 3 Player / 4 Player Setups

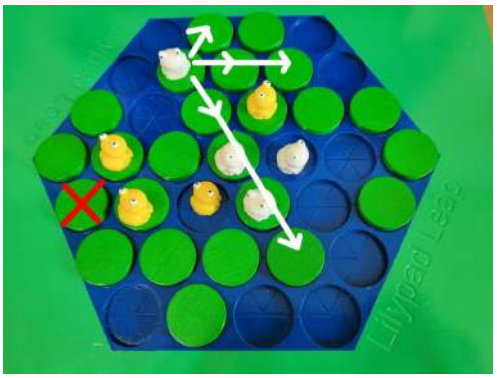

- Whoever last saw a Frog in a pond takes the first turn.
- You win when you are the only player who has a Frog on a lilypad.
- Your turn goes through 2 phases: Leap and Push.
- If you cannot Leap (no accessible lilypads):
    - Remove the lilypads from underneath your Frogs.
    - You are out of the game.
- Leap Phase:
    - Choose 1 of your Frogs on a lilypad.
    - Move your Frog in a straight line to another lilypad.
    - Your Frog jumps over water, lilypads, and your own Frogs.
    - Opponent Frogs block its movement.
    - Remove the lilypad your Frog jumped from.
- Push Phase:
    - Check in each direction adjacent to your moved Frog for opponent Frogs.
    - Opponent Frogs are pushed away 1 space from your moved Frog if:
        - The opponent Frog is on a lilypad
        - Another space is in the same direction away from your moved frog
            - That space is Water or a lilypad without a Frog.

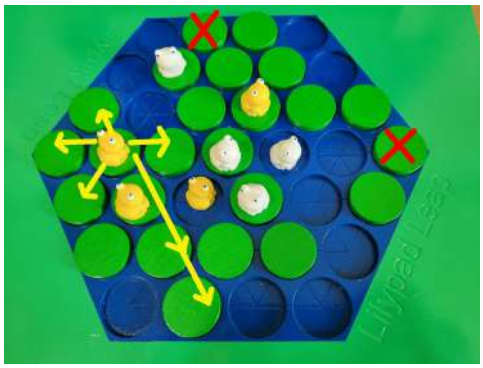

Example: White Frog Leaps / 2 Opponent Frogs Pushed

Leap Examples: White Frog Options / Yellow Frog Options

Poison Frog: 4 Player Setup

Poison Frog Mode Rules

- Poison Frog is an additional team, controllable by any player.
- On your turn, you can move either one of your Frogs or a Poison Frog on a lilypad.
- Your Frogs still sink if none of them have a lilypad to reach.
- Poison Frogs never sink for lack of lilypad to reach.
- If all of your Frogs are in the water, your turn is not skipped if any Poison Frogs are on a lilypad - you must move a Poison Frog.
- Setup: reuse player setups for count + 1 player, assign 1 team as Poison.

Suggestions:

- Each player keeps 1 unused Frog to track their team
- Each player keeps Lilypads removed to track number of turns.
