Twisted Center

twisting abstract strategy for 2 players in 15 minutes
by quantumpotato

Setup

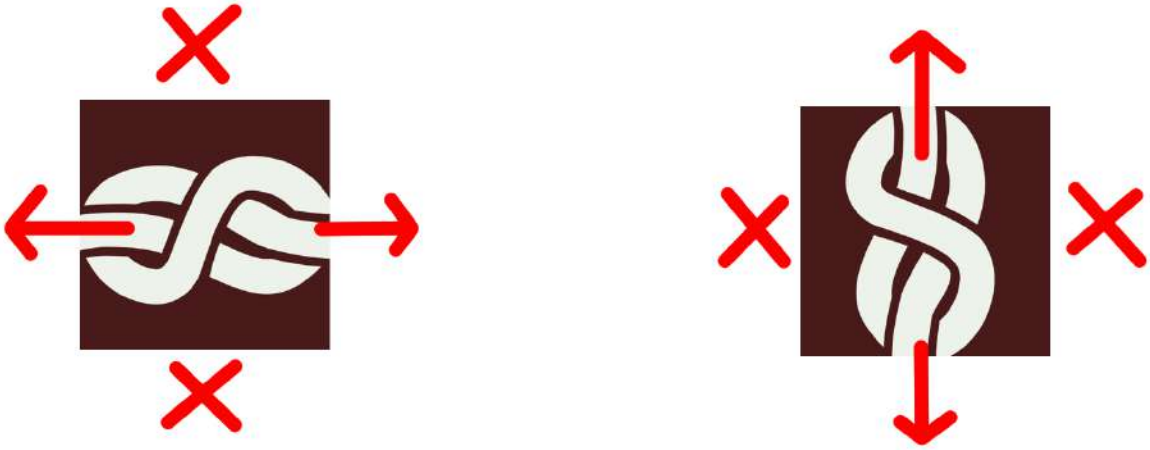

Green & White each have 4 vertical knots and 2 horizontal Knots as shown in the picture.
4 tiles marked with red are the center.
The 4 corners off the board are used for captured Knots.

Decide who plays Green & who plays White. Green takes the first turn.

Knot Orientation

Knots can be oriented vertically or horizontally.
This orientation controls which directions the knot can move.

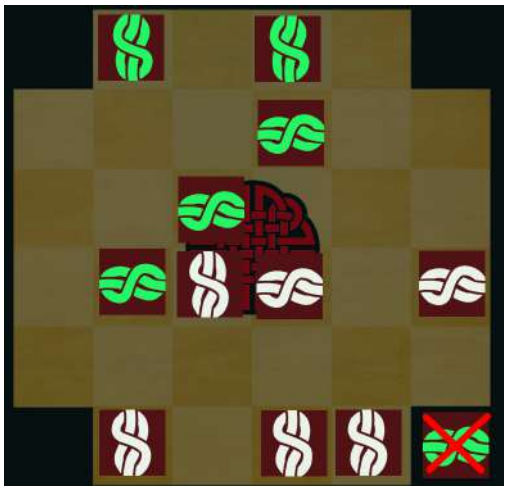

On Your Turn

Step 1: Choose a Knot

Choose 1 of your uncaptured Knots on the board.

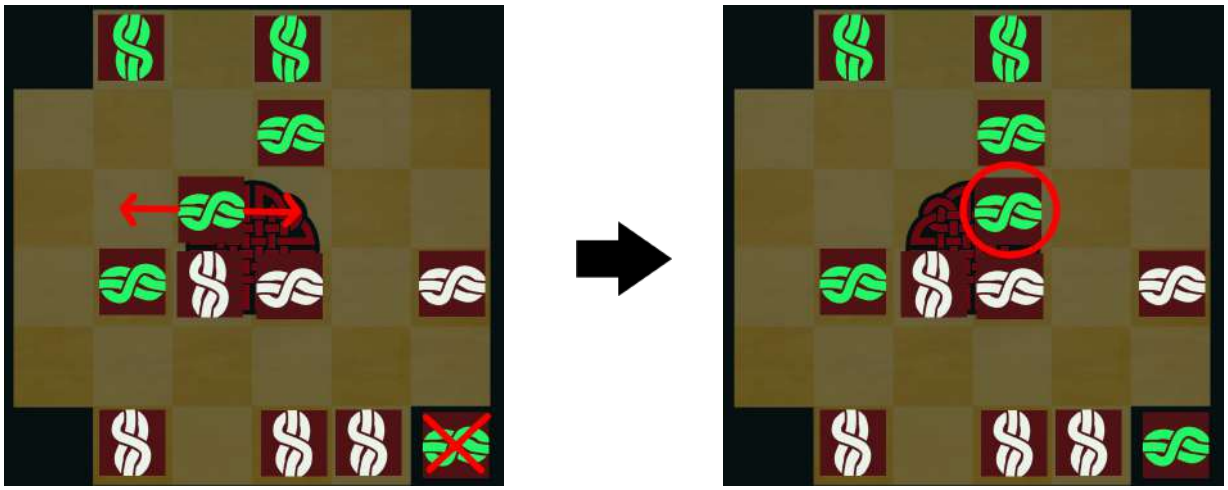

Green has 5 Knots available to choose from.
The Knot in the corner has been captured and cannot be chosen.

Step 2: Move Your Knot

Move your Knot 1 tile in either direction of its orientation.

Green moves the chosen Knot 1 tile in line with its horizontal orientation.

Step 3: Flip & Resolve

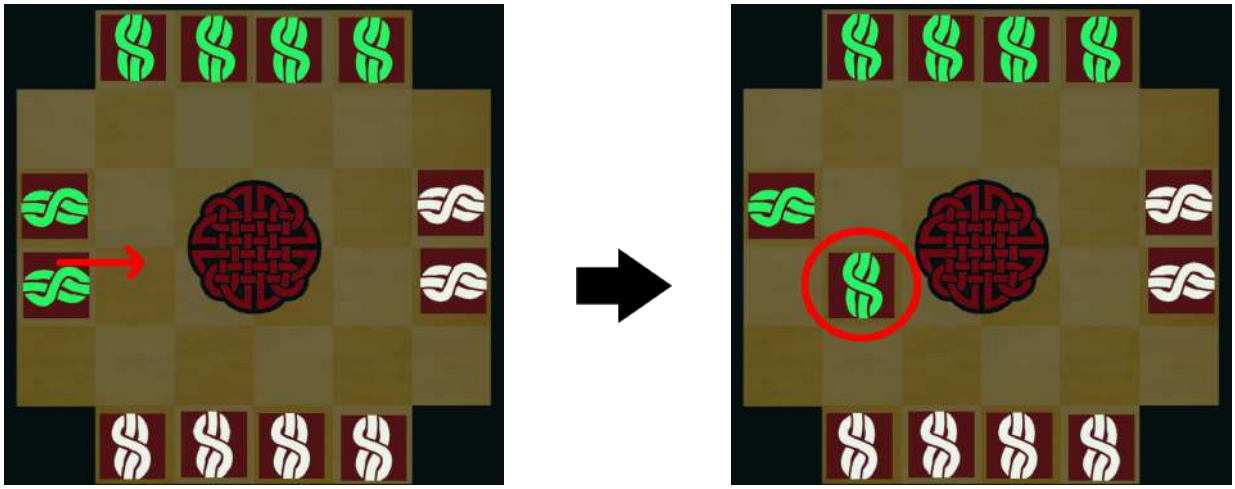

Flip the Knot you moved over, changing its orientation.

Depending on the tile you moved your Knot to and the tile behind that, resolve the interaction.

Empty Tile

There are no interactions when you move your Knot onto an empty tile.

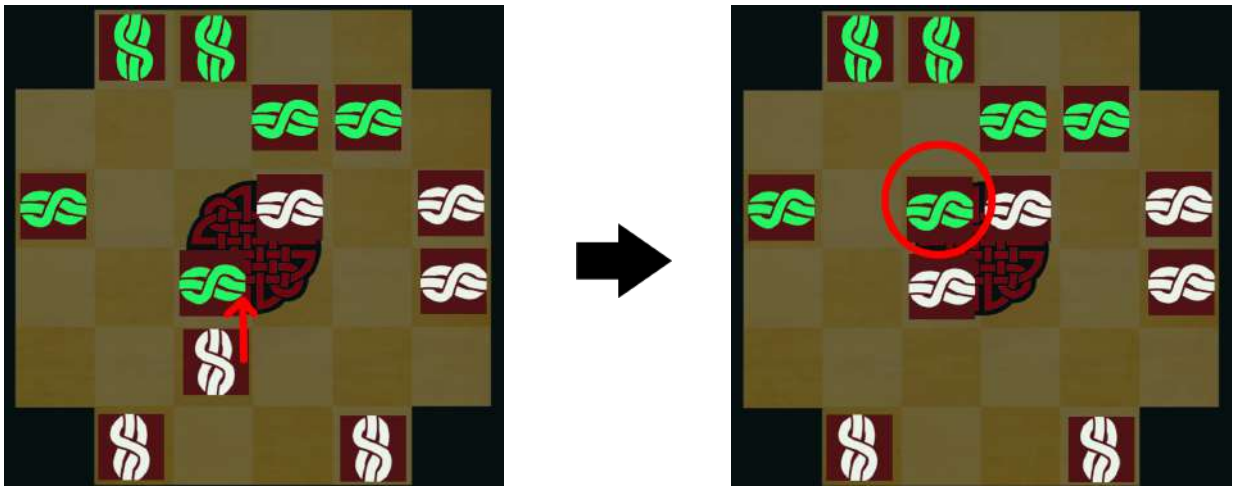

Green moves a Knot onto an empty tile.

Another Knot, Empty Tile

When you move your Knot into another Knot and there is an empty tile behind the other Knot: Push the other knot onto that empty tile.

White moves a Knot into another Knot with an empty tile 1 tile further.
The green Knot is pushed onto the empty tile.

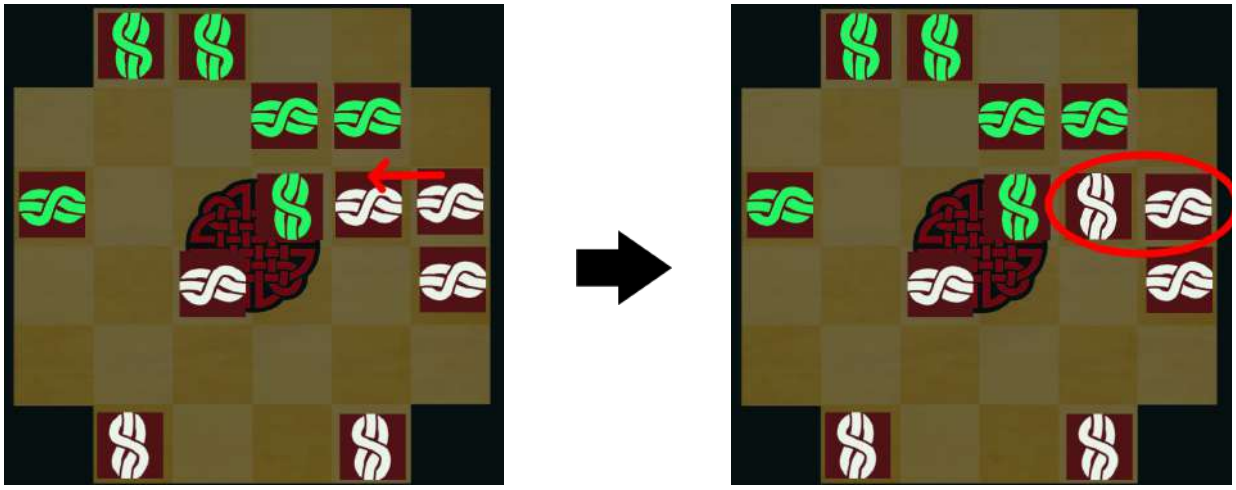

Trapped Friendly Knot

When you move your Knot into one your own Knots &,
Behind that Knot is another Knot or off the Board:

Pick up the Knot you moved your chosen Knot into:
Place it where your chosen Knot was at the start of your turn.

White moves a Knot into a friendly Knot.

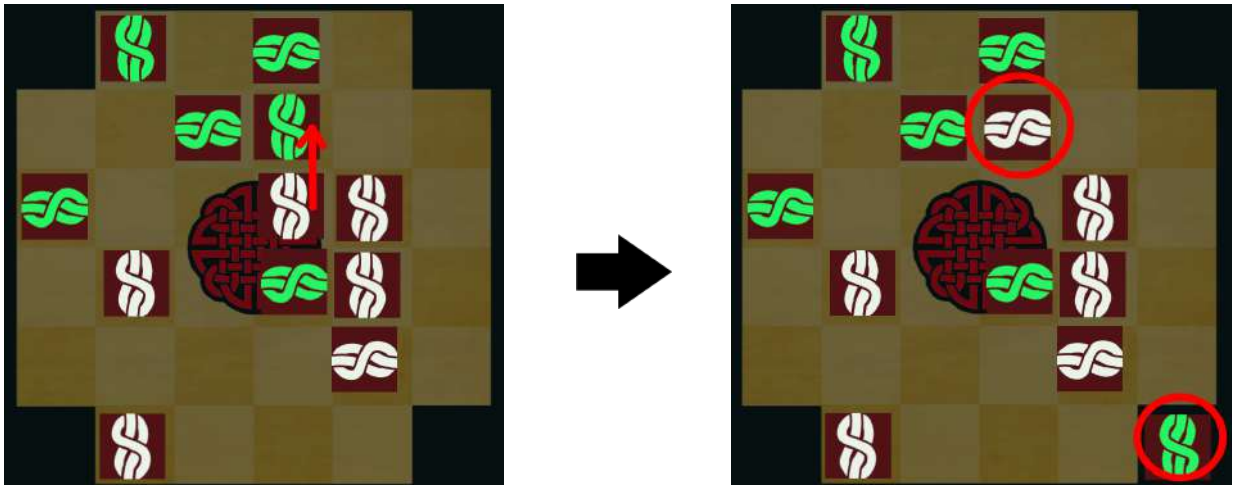

Trapped Opponent Knot

When you move your Knot into an opponent Knot &,
Behind that Knot is another Knot or off the Board:

Capture the opponent Knot. Remove it and place it off the board.

White captures an opponent Knot.

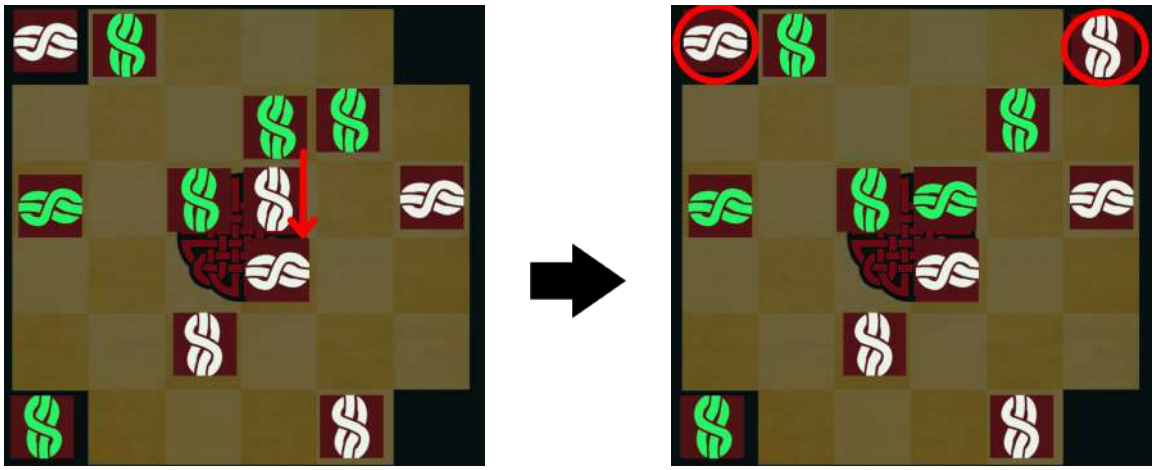

Step 4: Check for Victory

Check for Victory conditions. If none are satisfied, your opponent's turn starts.

Twisted Victory

You win if you have captured 2 Knots.

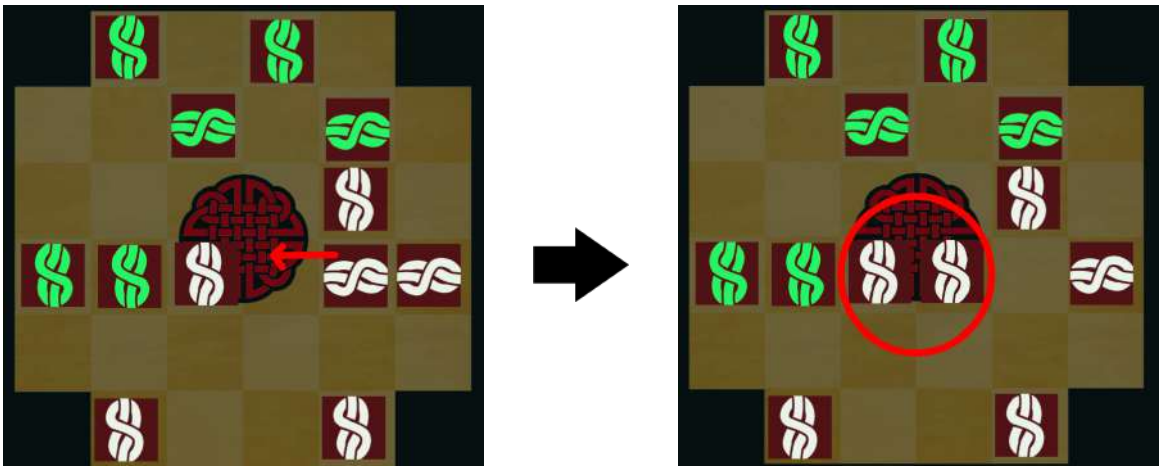

Green moves and captures, moving a second White knot off the board.
Green Twisted Victory.

Center Victory

If this is White's turn:
A player with 2 knots on the 4 tile center wins if their opponent has none.

White moves a Knot onto the center.
White Center Victory.
